JNP is an interactive multimedia experience, where our two main characters, nine-year-old Jane and Jake learn to deal with the day-to-day challenges of growing up with the help of their mentor, Oracle, a very wise talking goldfish, who regularly whisks them off to the magical, colorful and empowering undersea world of Awesome. There they meet a host of colorful and engaging creatures, play games and work together to overcome problems, which surprisingly lead them to insights into how to solve their current challenge. Jane and Jake return to the real world having enjoyed themselves with prizes in hand, and learned skills together to help them cope with their current problems along the way. They return stronger and empowered. And, they can't wait to go back!
